Executive Summary xxv

Abstract xxviii

Chapter-1. Introduction 1-9

1.1.Overview 1

1.2.Motivation 2

1.3. Problem statement 4

1.4. Objectives 5

1.5. Research methodology 5

1.5.1. Theoretical framework 5

1.5.2. Experimental work 6

1.5.3. Sources of data 7

1.5.4. Software tools 7

1.6. Research contribution 7

1.7. Chapter scheme 8

Chapter-2. Literature review 10-21

2.1. Literature review 10

2.2. Research Gaps 20

Chapter-3. Architecture of Smart grid technology 22-68

3.1. Introduction to Smart grid technology 22

3.2. Smart microgrid 25

3.3. Smart grid communication infrastructure 28

3.3.1. Home area network 30

3.3.2. Neighborhood area network 34

3.3.3. Wide area network 34

3.4. Communication standards for Smart grid applications 34

3.4.1. Wireless communication standards for smart grid applications 37

3.4.1.1. Bluetooth 37

3.4.1.2. WirelessHART 41

3.4.1.3. Zigbee 45
3.4.1.4. Wavenis 48
3.4.1.5. 6LOWPAN 49
3.4.1.6. Wireless fidelity/WLAN 52
3.4.1.7. Z Wave 55
3.4.1.8. WiMAX 57
3.4.1.9. Cellular communication standard 58
3.4.1.10. Cognitive radio 61
3.4.2. Wired communication standards for Smart grid applications 63
3.4.2.1. PRIME 63
3.4.2.2. G3 64
Chapter-4. Cross layer optimization 69-159
4.1. Introduction to layered vs cross layer design 69
4.2. Case studies of Cross layer (Joint) optimization 73
4.2.1. Joint optimization of IEEE 802.11 parameters using PAMVOTIS Software 73
4.2.2. Cross layer parameter optimization of Home area network 117
4.2.3. Cross layer parameter optimization of Neighborhood area Network 145
Chapter-5. Design and implementation of wireless monitoring and control of smart microgrid power system using PAN, LAN and WAN 160-184
5.1. Introduction to Smart microgrid power system 160
5.2. Design and implementation of wireless monitoring and control of Smart microgrid power system using personal area network 161
5.3. Design and implementation of wireless monitoring and control of Smart microgrid power system using local area network and wide area network 168
Chapter-6. Issues and challenges in realization of Smart grid communication Infrastructure 185-194
6.1. Introduction 185
6.2. EMI issues and challenges in Smart grid infrastructure 185
6.2.1. High Power EMI 186
6.2.2. Conducted EMI 187
6.2.3. Radiated EMI 187

6.2.4. Electro Static Discharge (ESD) 188
6.3. Cyber security issues in Smart grid communication infrastructure 188
6.3.1. Denial of service (DoS) attack 190
6.3.1.1. Identity Spoofing 190
6.3.1.2. Side channel attacks 190
6.3.2. Password stealing 190
6.3.3. Eavesdropping 190
6.3.4. Malware attack 191
6.3.5. Intrusion 191
6.3.6. WSN security 191
Chapter-7. Conclusion and future research 195-198
