

ACKNOWLEDGEMENTS

I would like to thank several people who have been of great help to me during my Ph. D. journey. The most important contribution comes from my guide Dr. Anil Kumar, co-guide Dr. Ashish Tripathi and external guide Dr Dinesh Kumar Likhi, who were very meticulous in guiding me at every step of this exciting research. I got constant encouragement and motivation during my research work. They used their experience and wisdom and were patient in explaining me various concepts of research work, all through the course. But for their guidance the completion of this work would not have been possible.

I am also grateful to Dr Isher Judge Ahluwalia and Dr Gajendra Haldea for their insights into public private partnerships in infrastructure in general and urban transportation in particular. I consider myself fortunate to have got their valuable inputs which made important contribution to the research work. I would also like to thank Mr N.V. S Reddy, MD, Hyderabad Metro Limited for facilitating the field study on Hyderabad PPP metro.

My thanks are also due to Mr Surendra Tiwary, my friend and Director, QGSPL who guided me in the use of statistical tools for the analysis and for interpretation of results. I would also like to thank my younger sister Dr Manjula K Saxena for being available whenever I needed some clarifications on research process and format of report.

I would also like to express my gratitude to my mother who has been a constant source of inspiration to me since my child hood. My thanks are also due to my wife and daughter for their support during my long hours of engagement in the research work.

Last but not the least, I would like to thank all respondents from Indian metro sector who participated in the opinion survey and made this research work successful.

(Rakesh Kulshreshtha)
