

TABLE OF CONTENTS

Declaration Certificate	i
Thesis Completion Certificate	ii
Acknowledgement	iii
Executive Summary	ix
List of Symbols	xv
List of Abbreviations	xviii
List of Figures	xxii
List of Tables	xxvi

Chapter 1

Introduction

1.1 Primary Energy Demand And Transportation Fuels	2
1.1.1 Global Perspective	2
1.1.2 Indian Perspective	5
1.1.2.1 National Biofuel Policy	6
1.1.2.2 Biomass Availability	7
1.2 Fuel Ethanol Technology	7
1.3 Biomass to Ethanol Conversion Process	8
1.4 Ionic Liquid as a Media to Extract Sugars	19
1.5 Research Objectives and Questions	20
1.6 General Research Methodology	22
1.7 Organization of Thesis	22

Chapter 2

Literature Review

2.1 Lignocellulosic Biomass and their Physicochemical Characterisation	28
2.2 Ionic Liquid as a “Green Solvent’ for Biomass Processing	36
2.3 Properties of Cation and Anion of Ionic Liquid	51
2.4 Mechanism of Cellulose Solubilization in Ionic Liquids	57

Chapter 3

Physicochemical Characterization of Different Agricultural Residue Available in Northern India to Assess their Biofuel Potentials

3.1 Introduction	64
3.2 Aim of Study	66
3.3 Research Methodology	67
3.3.1 Materials and Methods.....	69
3.3.1.1 Moisture Content	70
3.3.1.2 Volatile Matter	70
3.3.1.3 Higher Heating Values.....	71
3.3.1.4 Thermogravimetry and Differential Thermal Analysis	72
3.3.1.5 X-Ray Diffraction.....	72
3.3.1.6 Proximate Analysis	73
3.3.1.7 Compositional Analysis for Polysaccharides.....	73
3.3.1.8 FT-IR.....	74
3.4. Results and Discussion	75
3.4.1 Proximate, Ultimate Composition and Higher Heating Value	75
3.4.2 Thermal Properties Analysis.....	78
3.4.3 XRD Analysis	81
3.4.4 Compositional Analysis.....	82
3.4.5 Fourier Transform Infrared Spectroscopy	86

Chapter 4

The Cellulose Structural Transformation for Higher Enzymatic Hydrolysis by Ionic Liquids and Predicting their Solvating Capabilities

4.1 Introduction	90
4.2 Aim of Study	92
4.3 Research Methodology	93
4.3.1 Material and Methods	94
4.3.1.1 Material.....	94
4.3.1.2 Ionic Liquid Treatment.....	94
4.3.1.3 Enzymatic Saccharification.....	95
4.3.1.4 Kamlet-Taft (K-T) Parameters.....	96
4.3.1.5 Kinematic Viscosity.....	97
4.3.1.6 Surface Tension.....	98
4.3.1.7 Powder X-Ray Diffractometry (PXD).....	98
4.3.1.8 FT-IR.....	98
4.3.1.9 Statistical Analysis.....	99
4.4 Results and Discussion	99
4.4.1 Treatment and Enzymatic Saccharification.....	99
4.4.2 Impact of K-T Parameters on Enzymatic Saccharification.....	103
4.4.3 Impact of Viscosity on Enzymatic Saccharification.....	107
4.4.4 Impact of Surface Tension on Enzymatic Saccharification.....	109
4.4.5 Impact of Size of Cation and Anion.....	111
4.4.6 Structural Changes in Treated Cellulose.....	112
4.5 Conclusion	117

Chapter 5

Ionic Liquid Pretreatment of Biomass for Sugars Production: Driving Factors with A Plausible Mechanism for Higher Enzymatic Digestibility

5.1 Introduction	120
5.2 Aim of the Study	121
5.3 Research Methodology	122
5.4 Experimental	123
5.4.1 Materials and Methods	123
5.4.2 Ionic Liquid Pretreatment	123
5.4.3 Compositional Analysis of Biomass	124
5.4.4 Enzymatic Hydrolysis.....	125
5.4.5 IL Properties and Biomass Characterisation.....	126
5.5 Results and Discussion	126
5.5.1 IL Properties vis-a-vis Enzymatic Hydrolysis.....	132
5.5.1.1 Kamlet–Taft Parameter.....	132
5.5.1.2 Impact of Viscosity and Surface Tension of ILs on Enzymatic Hydrolysis.....	136
5.5.2 Xylan Removal vis-a-vis Enzymatic Hydrolysis.....	138
5.5.3 Lignin Removal vis-a-vis Enzymatic Hydrolysis	140
5.5.4 Effect of Biomass Structural Features on Enzymatic Hydrolysis	144
5.6 Plausible Mechanism for Better Enzymatic Hydrolysis	151
5.7 Impact of Variability of Biomass.....	154
5.8 Conclusion	155

Chapter 6

Physicochemical Alteration of Ionic Liquid Pretreated Mustard Stalk for Improved Enzymatic Accessibility

6.1 Introduction	157
6.2 Aim of Study	159
6.3 Experimental Section	159
6.3.1 Materials	159
6.3.2 Ionic Liquid Pretreatment	160
6.3.3 Compositional Analysis and Enzymatic Saccharification	160
6.3.4 DSC Measurement.....	160
6.3.5 FT-IR.....	162
6.3.6 BET Specific Surface Area.....	162
6.3.7 Scanning Electron Microscopy (SEM)	162
6.3.8 Statistical Analysis.....	163
6.4 Results and Discussion	163
6.4.1 Chemical Composition and Enzymatic Hydrolysis	163
6.4.2 DSC Analysis of ILs Treated Biomass	164
6.4.3 BET Surface Area Analysis	168
6.4.4 FT-IR Analysis	171
6.4.5 SEM	174
6.5 Conclusion	176

Chapter 7

Conclusions and Future Directions

7.1. Conclusions	177
7.2 Future Directions	180
References	182
Short CV	207
