10 CO2

SECTION-D [50]

Q8. Read the following case carefully and answer the questions following it.

As one of the first to enter the field of office automation, Sagatec Software Inc. had built a reputation for designing high quality and user-friendly database and

20 CO1

	<p>accounting programs for business and industry. When they decided to enter the word-processing market, their engineers designed an effective, versatile, and powerful program that Sagatec felt sure would outperform any competitor.</p> <p>To be sure that their new word-processing program was accurately documented, Sagatec asked the senior program designer to supervise writing the instruction manual. The result was a thorough accurate and precise description of every detail of the program’s operation.</p> <p>When Sagatec began marketing its new word processor, cries for help flooded in from office workers who were so confused by the massive manual that they could not even find out how to get started. The several business journals reviewed the program and judged it “too complicated” and difficult to learn.” After an impressive start, sales of the new word-processing program plummeted. its reputation for producing easy to-use business software.</p> <p>Sagatec eventually put out a new, clearly written training guide that led new users step by step through introductory exercises and told them how to find commands quickly. But the rewrite cost Sagatec \$350,000, a year’s lead in the market, and its reputation for producing easy-to-use business software.</p> <p>Q1. Discuss the process of communication in this case (who is communicating to whom, about what, how and why).</p> <p>Q2. Identify the communication problem and the reason for the same.</p> <p>Q3. Explain the consequences of this communication challenge.</p> <p>Q4. Identify the possible solutions that could have prevented the problem. Also, chart out the benefits that could have been derived from preventing the problem.</p>		
Q9.	Stray dogs have made the life of people difficult in Candy County- a suburban township. Write a petition to address this cause in accordance with the guidelines of PETA (People for the Ethical Treatment of Animals).	12	CO3
Q10.	A criminal may not be punished in retrospect. So then what is the implication /consequence of #metoo campaign that has recently gained momentum on social media. Write a report in about 180-200 words stating your opinion on the subject. Substantiate your point by using relevant attributes/sources/quotes.	18	CO4

SECTION-D [50]			
Q8	In an unfortunate accident that happened on Dussehra this year, a train ran over onlookers in Amritsar. Write a report in about 180-200 words whether self-awareness or the administration is to be blamed for the death of sixty onlookers and the suicide of the driver.	18	CO4
Q9.	There have been repeated cases of accidents on the way to the university, due to over speeding. Most of these can be avoided if a check on speed limit is maintained through the deployment of traffic police every 5 Kms. This can also be done by getting the speed recording devices installed. Strict action such as imposition of heavy fine or even confiscation or cancellation of license should be taken against rash drivers. Draft a petition for the same	12	CO3
Q11.	<p>Read the following case and answer the questions following it.</p> <p>Bruce, a research chemist for a major petro-chemical company, wrote a dense report about some new compounds he had synthesized in the laboratory from oil-refining by-products. The bulk of the report consisted of tables listing their chemical and physical properties, diagrams of their molecular structure, chemical formulas and computer printouts of toxicity tests. Buried at the end of the report was a casual speculation that one of the compounds might be a particularly effective insecticide.</p> <p>Seven years later, the same oil company launched a major research program to find more effective but environmentally safe insecticides. After six months of research, someone uncovered Bruce's report and his toxicity tests. A few hours of further testing confirmed that one of Bruce's compounds was the safe, economical insecticide they had been looking for.</p> <p>Bruce had since left the company, because he felt that the importance of his research was not being appreciated.</p> <p>Q1. Discuss the process of communication in this case (who is communicating to whom, about what, how and why).</p> <p>Q2. Identify the communication problem and the reason for the same.</p> <p>Q3. Explain the consequences of this communication challenge.</p> <p>Q4. Identify the possible solution that could have prevented the problem. Also, chart out the benefits that could have been derived from preventing the problem.</p>	20	CO1
