	Same Accident, Different Perceptions		
	According to the police report, on July 9 at 1:27 P.M., bus number 3763 was		
	involved in a minor noninjury accident. Upon arriving at the scene of the accident,		
	police were unable to locate the driver of the bus. Because the bus was barely		
	drivable, the passengers were transferred to a backup bus, and the damaged bus was		
	returned to the city bus garage for repair. The newly hired general manager, Aaron		
Q1.	Moore, has been going over the police report and two additional reports. One of the		
	additional reports was submitted by Jennifer Tye, the transportation director for the		
	City Transit Authority (CTA), and the other came directly from the driver in the		
	accident, Michael Meyer. According to Tye, although Mike has been an above-

bicycle. Because the receiver broke open on impact, Mike was forced to walk four blocks to the nearest phone to report the accident. As soon as he reported the accident to the company, Mike also called the union to tell them about it. Mike reports that when he returned to the scene of the accident, his bus was gone. Uncertain of what to do and a little frightened, he decided to return to the CTA terminal. Because it was over a five-mile walk and because his shift had already ended at 3 P.M., Mike stopped in for a quick beer just before getting back to the terminal.

- a. Write a brief synopsis of the case (5 marks)
- b. Why are the two reports submitted by Jennifer and Mike so different? Did Jennifer and Mike have different perceptions of the same incident? (5 marks)
- c. What additional information would you need if you were in Aaron Moore's position? How can he clarify his own perception of the incident? (5 marks)
- d. Given the information presented above, how would you recommend resolving this problem? (5 Marks)
