SECTION-D (2Qx25M=50 Marks)			
Q 12	The material factors of globalization – i.e. the technical advancements in transportation, communication and economy – have evolved in leaps and bounds in human history. The last leaps and bounds have been the first, second, third and today the fourth industrial revolution, the electronic revolution. Since the French		

	<p>Revolution, the ideological factors of the globalization process (i.e. the spreading of human and people rights) have also evolved in leaps and bounds. These material and ideological factors have an effect on the world as a whole and also within a single country. Many argue that globalization has an important role to play in transforming welfare states into competitive states. It means that as investment and trade flow increase, national economies are increasingly pitted against each other in a competitive struggle.</p> <p><i>a. Is globalization a source of order or disorder in world politics? Are you persuaded by the liberal view that globalization creates the conditions for a more stable world order? Why or why not?</i></p> <p><i>b. Define the nature of the International Political Economy. What are the chief drivers of economic globalization?</i></p>	25	CO4
Q 13	<p><i>a. What do you mean by nuclear proliferation? Discuss the various initiatives taken by the United Nations to prevent the spread of nuclear weapons. What are the principal criticisms levelled against such initiatives?</i></p> <p><i>b. Why did environmental issues appear on the international agenda and what were the key turning points? Climate change has created a divide between North-South or developed and developing countries. Discuss the developing countries stand on climate change.</i></p>	25	CO3
